

New Zealand Camellia Society Varietal Registration

I hereby apply for registration of the new camellia cultivar described below:

Proposed name 2nd choice

Species: Japonica..... Sasanqua..... Reticulata..... Other.....

Hybrid

IF SEEDLING: Age..... Year first bloomed..... Chance Seedling

Female Parent Male Parent (if known)

Seedling originated by Address

Seedling propagated by Address

IF SPORT (Mutant): Name of Parent Year first observed Year first propagated

Number of years flowered on propagation

Has it bloomed 100% true for at least two years? On how many different plants?

YEAR OF COMMERCIAL INTRODUCTION Has Name and Description of this variety been published?

If so, when and where.....

PLANT — Growth Habit: Upright Spreading Average

Dense Open Average

PLANT — Growth Rate: Rapid Medium Slow

LEAF — Size: (use 3 good leaves) Average length Width

Colour: Light green Dark green..... Other.....

FLOWER: Check the form and variety which your flower resembles most closely.

- SINGLE (One row of not over 8 petals).
- SEMI-DOUBLE (Two or more rows of regular, loose or irregular petals, conspicuous stamens).
- ANEMONE FORM (One or more rows of large outer petals lying flat or undulating; the centre a convex mass of intermingled petaloids and stamens).
- PEONY FORM (A deep, rounded flower, with loose petals and intermingled stamens, to a convex mass of mixed petals, petaloids and stamens, or irregular petals never showing stamens, of full form).
- ROSE FORM DOUBLE (Imbricated petals, showing stamens in a concave centre when fully opened).
- FORMAL DOUBLE (Fully imbricated, many rows of petals, never showing stamens).

Were measurements made from greenhouse protected flowers? Please give average size (use 3 good flowers)

SIZE (to nearest centimetre): Diameter Depth..... No. Petals No. Petaloids

COLOUR OF FLOWER (verbal description): RHS Colour Chart.....

COLOUR OF STAMENS (verbal description): Anther Filaments

FLOWERING SEASON

Other noteworthy flower characteristics, such as texture, lasting qualities, uniqueness, fluorescence, etc.

.....

..... (Use other side for additional information).

Colour slides or colour prints are an important part of the registration record. Please include a colour slide or colour print with the registration application. Please send a young flower in good condition for colour registration. Put it in a plastic bag slightly dampened, and put in a small packet for posting. A fee of \$25.00 is required for the registration.

Applicant's Signature and Address

Date

Send a signed copy of this application to The Registrar, Derek Beard, 14 Jasmine Place Mt Maunganui 3116, email NZCSPresident@gmail.com

The purpose of the registration is to ensure that all cultivars which enter circulation are recorded, with adequate description, under names which comply with the International Code of Nomenclature and which are not already in use. It is emphasised that registration makes an official record of the name and description but does not convey any implication of merit. Registrations are published in the New Zealand Camellia Bulletin.
